  - Special recognition at Friends events & Salvage Barn

*Friends of Historic Preservation* honors and values our architectural heritage by preserving and protecting historic buildings and neighborhoods, and by increasing awareness of the cultural, environmental, and economic benefits of preservation. We accomplish this through education, advocacy, and hands-on preservation.

Because sustainability is key to historic preservation, we also deconstruct older houses that are slated for demolition and then sell the architectural materials at our Salvage Barn, thus keeping historic and still useful materials out of the landfill

*Please join us in this important work.*
